Qualifying organisation

The Qualisport nomenclature is a reference tool for customers using the Sport & Leisure qualification.

It is composed of 8 activities:

# Nomenclature

# Qualisport qualifications are hierarchically structured

(for example: Swimming Pools)

The 1<sup>st</sup> figure defines the segmentation of the Sports & Leisure activity.

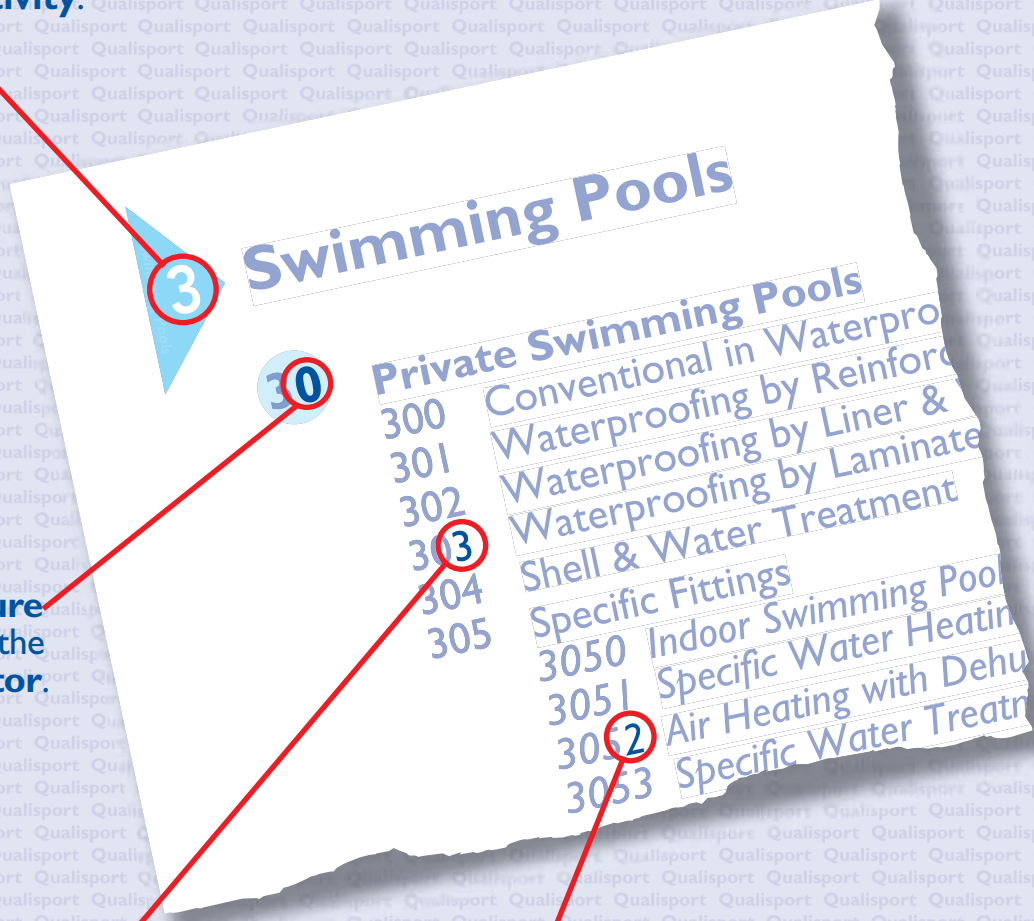

The 2<sup>nd</sup> figure determines the type of sector.

The 3<sup>rd</sup> figure characterises all the qualifications of the sector.

The 4<sup>th</sup> figure characterises the subset of qualifications of the sector.

The awarding of certain qualifications triggers the awarding of other qualifications in complementary specialist fields.

The sector standards and the award standard define the requirements which companies must meet.
